We're looking for a **DATA ANALYST** passionate about education in Africa!

Ubongo is a social enterprise that seeks to transform learning for the 440 million kids in Africa through interactive edutainment, delivered via accessible technologies. We produce [Ubongo Kids](#), an interactive edu-cartoon that teaches math and science through fun animated stories and catchy original songs.

Viewers can interact with Ubongo Kids from basic mobile phones, answering SMS questions about what they learned on the TV show, and winning voice calls and songs from their favorite cartoon characters.

Ubongo is looking for an experienced data analyst who will work with the monitoring and evaluation and product management teams to ensure field data is rigorously gathered, systematically analyzed, and used to generate high quality, actionable information and reports. The data analyst position can be offered as full-time or part-time based on experience and the candidate will work from our office is located in Dar es salaam, Tanzania.

Responsibilities:

- Compile, organize and analyze large data sets from our various projects and studies using statistically sound methodologies. These include but are not limited to: survey and demographic data, observational data from user testing, quiz results, impact study results, mobile system data, online analytics and more.
- Assist with project planning to ensure that field data is properly gathered and registered. ensuring the quality of data entered and helping to produce initial statistical analyses
- Work with Monitoring and Evaluation Consultant to identify the key performance questions and parameters for monitoring project performance and comparing it to targets.
- Assist on carrying out survey design in accordance with agreed-on procedures and standards
- Review existing approaches and information management systems and implement changes as needed.
- Develop and submit M&E and impact reports to partners, investors and stakeholders.
- Organise and undertake training with enumerators
